

Andrew Napier

Lead Cloud Engineer

Introduction

Hello, I'm Andrew 🙋

I have been writing software professionally for the past 8 years. I've been fortunate enough to work at several incredible companies in a handful of industries, collaborate with exceptional people and witness the effectiveness of a variety of cultures, tools, stacks and processes.

I worked hard to gain a fairly comprehensive understanding of cloud engineering and am at a point where I feel confident in my ability to contribute value, regardless of stack or role as engineer. That said, I am under no illusion there is still a lot to learn.

I'm currently looking for an inspired team with exciting projects to contribute to, in a company culture that fosters genuine wellbeing. I find buy-in to a vision and freedom to execute motivating. Let's have a chat 💬.
